

Virtual Learning Assistance Disclaimer

Rising Generations Early Learning Center will provide a Virtual Learning Assistance program for school age students in elementary grades Kindergarten to Fourth in light of the local school jurisdictions' decision to implement virtual learning for the first half of the fall 2020-2021 school year. Our goal is to provide assistance to students as they navigate their way through lessons and assignments taught directly by their elementary school teachers. We would like to stress that our Virtual Learning Assistance program is not intended to be a replacement option for in school instruction from teachers. We intend to provide a structured and organized environment in which each student will be able to follow a set schedule while receiving guidance, direction and assistance from our staff.

We encourage all parents to review each student's daily assignments and projects for accuracy and completeness and seek advice and counsel from the student's teacher regarding grades, questions or concerns about challenges, progress etc. Rising Generations will not take responsibility for or be held accountable for grades earned by any student.

All students engaged in Virtual Learning Assistance are subject to their school's policies, procedures and rules applicable to students enrolled in traditional classes, but not limited to, the school's discipline code and prohibitions on academic dishonesty, discrimination, harassment, bullying and cyberbullying.
